

NETWORKING 07

LAN vs WAN

👉 LAN = Local Area Network

📌 Simple:

Small network in one place

Examples:

- Home WiFi 🏠
- College lab 🏫
- Office network

Features:

- Short distance
- Fast
- Uses **private** IPs

Example:

192.168.1.5

WHAT IS WAN?

👉 WAN = Wide Area Network

📌 Simple:

Large network connecting many LANs

Example:

- Internet 🌐

Features:

- Large area
- Slower than LAN
- Uses **public** IPs

Example:

49.x.x.x

Feature	LAN	WAN
Area	Small	Large
Example	Home WiFi	Internet
IP type	Private	Public
Speed	Fast	Slower

Label:

- Devices → **LAN**
- Router → boundary
- Internet → **WAN**
- 👉 Inside your home:
- All devices connected = **LAN**

👉 Outside world:

- Internet = **WAN**

FINAL CYBER MINDSET

👉 Every attack is either:

- Inside (LAN)
- Outside (WAN)
